THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. Since January 1951, the Sovrompetrol Company has taken over the operation of all oil refining installations and the export of all Rumanian oil products. The distribution of oil products for domestic consumption was assigned to a company called Competroil, which was supplied by the Sovrompetrol oil refineries in Floesti.
2. In Bucharest Competroil was operating the following distribution depots:

25X1

- a. The Mogosoaia Depot, located in the Baneasa suburb north of Bucharest, is the largest depot of oil products in Bucharest. It is connected directly with Floesti by underground pipelines and is equipped with several underground and surface tanks. [redacted] there are approximately 14 tanks with a capacity of 1500 tons each, and one tank with a capacity of 600 tons.
- b. The Grivita No. 2 Depot, located opposite the Sfanta Vineri Cemetery in the Piata Chibrit on Calea Grivitei, is the second largest oil products depot in Bucharest. This depot is allegedly connected with Floesti by underground pipes.
- c. The Dealul Spirei Depot, located on a hill on Strada 13 Septembrie behind the Sport Field ANEF, has only one surface tank, which has a capacity of 100 tons, and distributes only gasoline.
- d. The Vergului Depot is located on Strada Vitin in the Pantelimon Section. It is equipped with four underground gasoline tanks, each with a capacity of 160 tons, and a smaller underground tank for

diesel oil, with a capacity of 40 tons.

- e. The depot located at 86 Strada Pieptenari has a track connecting it directly with the Bucharest-Giurgiu railroad. All the oil products in this depot are transported by railroad tank cars from Floesti. It is equipped with four surface tanks, each with a capacity of 1,500 tons, containing gasoline and kerosene; two underground tanks, each with a capacity of 400 tons each, containing diesel oil; one underground tank with a capacity of 400 tons, containing high octane gasoline; and three smaller tanks, each with a capacity of 13 tons, from which gasoline, kerosene and diesel oil are distributed to customers.
